

ABSTRACT

Antisense compounds, compositions and methods are
5 provided for modulating the expression of superoxide
dismutase 1, soluble. The compositions comprise antisense
compounds, particularly antisense oligonucleotides, targeted
to nucleic acids encoding superoxide dismutase 1, soluble.
Methods of using these compounds for modulation of superoxide
10 dismutase 1, soluble expression and for treatment of diseases
associated with expression of superoxide dismutase 1, soluble
are provided.
